

ESD Bitholders Stubby

45-070-0058 to -0059

High quality stubby bitholder for safe use on sensitive electronic components.

Technical data:

Surface resistance: $< 1 \times 10^5 \Omega$
Application standards: IEC 61340-2-3

REACH-compliant

Stainless steel stubby bitholder from Wera

Particularly small ESD bit hand-holder with short blade for electrostatically safe working even in hard to reach areas. Suitable for mounting bits with 1/4" external hexagon drive as per DIN ISO 1173-C 6.3 and Wera connection series 1.

The 2-component handle with the practical combination of hard and soft zones allows for a firm grip and precise working. The integrated retaining ring guarantees an optimal hold of the tool in the holder. The hexagon anti-roll protection avoids bits from rolling away annoyingly in the workplace.

Features	Picture	Part nr
Model nr: Wera 811 Bit holder: 1/4" 		45-070-0058
Model nr: Wera 809 Bit holder: 1/4" With retaining ring 		45-070-0059
